

[illegible]

Figure 10 shows two cross-sectional diagrams of a staircase, illustrating the calculation of the horizontal projection (Sloz) and vertical rise (Wzrost) for a flight with 10 steps. The top diagram shows a flight with a total horizontal projection of 180 cm and a total vertical rise of 120 cm. The bottom diagram shows a flight with a total horizontal projection of 180 cm and a total vertical rise of 144 cm. Both diagrams include a dashed line indicating the 'Dobrychod na zrazku' (good catch) and a dimension of 1.00 cm for the nosing.
